SUPPLEMENTAL SHOWING, RE: PART 94.15(b)

07/14/95

PURSUANT TO PART 94.15(b) OF THE FEDERAL COMMUNICATIONS
COMMISSION RULES AND REGULATIONS, AN ENGINEERING ANALYSIS
WAS PERFORMED BY COMSEARCH FOR:

LIBERTY CABLE TV
12 SIMPLEX PATHS IN NEW YORK
18 GHZ CABLE

THE RESULTS OF THE STUDY INDICATE THAT THE PROPOSED
FREQUENCIES DO NOT CAUSE INTERFERENCE CONFLICTS WITH ANY
EXISTING OR APPLIED-FOR FACILITIES IN THE AREA.

THE LICENSEES AND CALL SIGNS OF THE STATIONS CONSIDERED
IN THE ANALYSIS ARE AS FOLLOWS:

**Re: Liberty Cable Co., Inc.;
Request for Special Temporary Authority
FCC File No. 712203; FCC Call Sign WNTW782;
99 Battery, NYC**

Dear Sir or Madam:

Transmitted herewith, on behalf of Liberty Cable Co., Inc. is an original and one (1) copy of a request for special temporary authority ("STA") for the above referenced facility.

Enclosed is a check made payable to the Federal Communications Commission in the amount of \$45.00 to cover the necessary filing fees.

Questions with respect to this matter should be referred to the undersigned.

Sincerely,

001

Michael J. Lehmkuhl
Attorney for
Liberty Cable Co., Inc.

Special Temporary Authority
FCC File No. 712203
FCC Call Sign WNTW782

Liberty Cable Co. ("Liberty") respectfully requests special temporary authority ("STA") pursuant to Section 94.43 of the Commission's rules to operate an 18 Ghz operational-fixed microwave service ("OFS") station at 99 Battery, NYC in the manner described below. Given the extraordinary circumstances regarding the need for service, any delay in the institution of temporary operation would seriously prejudice the public interest.

Pursuant to Section 94.43(c) of the Commission's rules, the following is submitted:

1. Name, Address and Citizenship of Applicant

Liberty Cable Co., Inc.
215 E. 95th Street
New York, NY 10128
ATTN: Behrooz Nourain

2. Need for Special Action

Liberty is an alternative multichannel video programming distributor serving approximately 30,000 subscribers who live mainly in buildings in the New York metropolitan area. In the vast majority of cases, Liberty provides service pursuant to the Commission's action in Operational Fixed Microwave Service (Video Distribution System), 6 FCC Rcd. 1270 (1991) ("the 18 GHz Order") through microwave channels in the 18,142 - 18,580 band ("the 18 GHz band").

On February 21, 1995 Liberty applied to add a new path to its existing 18 GHz station, WNTW782, located at 99 Battery, New York City. This remains pending under FCC File No. 712203. A request for STA also is on file for this new paths (see, Attachment 1).

As Liberty previously has disclosed to the Commission, it recently initiated a thorough review of its internal licensing procedures and regulatory compliance. That review, which is still underway but rapidly nearing completion, disclosed that one additional new path (from the existing WNTW782 transmitter to Liberty Tower) had been activated before the company had filed for or received FCC authorization for the necessary license modifications. Accordingly, Liberty promptly modified pending application 712203 to add the path in question.¹

This request for STA is being filed so that Liberty can continue to use the path pending FCC action on the underlying

¹ The recent amendment also proposes the addition of two other paths that are not involved in the instant request for STA.

underlying application. Grant of the instant request will permit Liberty to honor its obligations to its customers and will support the establishment of effective competition in the Manhattan video delivery market.

When the 18 GHz Order granted private cable operators access to the 18 GHz band, the Commission voiced its conviction that the public interest was well served by allowing competition in the video services marketplace through wireless cable operators. The Commission said:

After carefully reviewing the record, we conclude that adoption of this proposal, ..., will promote the public interest by encouraging competition in the video distribution marketplace. The need for such action is well documented. This Commission recently conducted a review of marketplace developments in the video distribution industry in which we concluded that cable systems possess a disproportionate share of market power and, therefore, are capable of engaging in anti-competitive conduct. In these circumstances, competition provides the most effective safeguard against the specter of market power abuse. As competition from alternative multichannel providers such as second competitive cable operators, wireless cable multi-pinpoint distribution services, SMATV systems, and direct broadcast satellite ("DBS") emerges, we find that it would serve the public interest to enhance their competitive potential. 6 FCC Rcd. at 1271, para. 9.

The Commission also said:

In conclusion, cable systems increasingly dominate the multichannel video delivery services, resulting in criticism of the industry and complaints of anti-competitive conduct. Although rival multichannel providers are emerging in the marketplace, we recognize the need for action designed to encourage these operators to enter the marketplace and to increase their market viability. To improve the competitive potential of alternative multi-channel providers eligible to hold licenses in the Operation-Fixed Microwave Service, we take action in this proceeding permitting the use of the 6 MHz wide, point-to-point channels in the 18 GHz band for the distribution of video entertainment material. 6 FCC Rcd. at 1272, para. 16.

Furthermore, in its 1994 report to Congress on the status of competition in this marketplace, the Commission makes clear that little has changed in the way of competition; cable is still king. In sum, the public interest is well served by the promotion of competition by wireless cable operators in the video services marketplace.

The Commission action in opening the 18 GHz band to wireless cable operators has achieved its goal in that it has stimulated competition to incumbent cable monopolists. Liberty is competing head-to-head with Time Warner in Manhattan using this 18 GHz band. To compete effectively with Time Warner, Liberty must be allowed to continue its service to subscribers in those buildings which have elected to switch from Time Warner to Liberty. While this in no way justifies the premature activation of additional microwave paths in this instance, if Liberty cannot meet its customers' demand for service, those potential customers will cancel their contracts with Liberty and remain with Time Warner. The effect will also immeasurably damage Liberty's business and reputation.

Time Warner realizes that denial or even delay of the underlying application -- 712203 -- which seeks authorization of service paths to new Liberty customers will effectively eliminate Liberty as Time Warner's only significant competition in this market. Thus, Time Warner has filed a petition to deny grant of the aforesaid application and in doing so, has effectively thwarted Liberty from obtaining FCC authority to expand its business.

In this regard, Liberty believes that the Commission must strike a balance between Time Warner's right to be heard on its objections with the public's right to receive service in a timely manner and the public's right to the lower prices which competition brings. Liberty believes that such a balance can be struck if the Commission grants the instant STA subject to the Commission's decision on the Time Warner petition to deny the underlying application. Since Liberty's application is in technical order (including clearance of the paths by a frequency coordinator) and Time Warner has not challenged Liberty's applications on a technical basis, and since the grant of the STA requested herein will not prejudice in any way Time Warner's right to be heard on its objections to the Liberty application or the Commission's ability to decide the petition to deny, Liberty respectfully requests immediate grant of this STA as requested herein.

3-5. Type, Purpose and Date of Operation

Fixed transmission of video and audio signals in the 18 GHz band. The equipment will be used to distribute applicant's own products or services, including video entertainment programming, to private cable buildings on frequencies in the 18,142 - 18,580 MHz band. Liberty requests authority for twenty-four (24) hour operation pending action on the application for license and requests that such authority begin on the tenth day following the filing of this request for special temporary authority.

6-12. Technical Information

Liberty will operate the station in conformance with the technical specifications outlined in the referenced application(s).

Liberty certifies that no party to the application is subject to a denial of federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, codified at 21 U.S.C. Section 862.

Please address all correspondence regarding this matter to Liberty's counsel, Michael J. Lehmkuhl, Esq., Pepper & Corazzini, L.L.P., 1776 K Street, N.W., Suite 200, Washington, D.C. 20006 as well as the undersigned.

Respectfully submitted,

Peter O. Price
President
Liberty Cable Co., Inc.
